**TECHNICAL EXPERIENCE**

---

**Projects**

- Incrementum** (July 2019 - Present). A set of tools geared towards assisting game developers with a variety of tasks for incremental / idle game development. Provides formulas and iterative models of a variety of incremental / idle game progression systems as well as a robust numeric library that supports multiple notations. *C++, SDL*
- Schedule It!** (October 2019 – December 2019). A scheduling web application for time management, and coordinating meetings. You can create events, invite friends to your events, and join other events! *React, Javascript, Firebase*
- Unconventional Space** (March 2019 – May 2019). A 3D VR puzzle game involving manipulating the user's perception of space to simulate non-euclidean geometry, creating these seemingly impossible illusions. *C#, Unity, Oculus*
- Runescape Bot** (March 2018 – May 2019). Created an automation program for the game that simulated human interaction while completing specific tasks at a reasonable speed. *C++, SDL, OpenCV, TensorFlow*
- Tanks AI** (April 2019). Developed a dynamic AI bot for the Unity Project *Tanks* whose behavior and difficulty is based on the actions the player takes. *C#, Unity*
- Pac-Man** (Jan 2019). A recreation with custom ghost A.I. *C++, SDL*

---

**Languages and Technologies**

---

- C++; C#; SQL; Java, Javascript; Bash; Python; HTML; CSS
- Unity; SDL; Oculus, SFML; OpenCV; OpenGL; Unreal Engine; React; Firebase; TensorFlow; Github; Unity Ads; Facebook Ads; ironSource; AppsFlyer

---

**Other**

---

- Created a Discord bot for my server that moderated conversations, delivered notifications, and scheduled events.
